EDUCATION

GEORGIA INSTITUTE OF TECHNOLOGY

Atlanta, Georgia

Bachelor of Science in Computer Science

05/2026

- Concentration: Modeling & Simulation and Information Internetworks
- Minor: Computing & Business (Denning Technology & Management Program)

GPA: 3.84/4.00

TECHNICAL SKILLS

Languages: Python, Java, TypeScript, Javascript, SQL, C, HTML/CSS, VBA

Libraries/Frameworks: Flask, React.js, Pandas, NumPy, scikit-learn, Plotly, Recharts, spaCy, OpenAI API, Regex

Software/Tools: Google Cloud Platforms, Git/GitHub, Jupyter Notebook, Jira, Agile/Scrum, REST APIs, Docker, Regex

PROFESSIONAL EXPERIENCE

Software Engineer Consultant, risk3sixty - Atlanta, Georgia

08/2025 to Present

- Design a scalable data sanitization pipeline (regex + spaCy) to anonymize sensitive enterprise data for LLM ingestion.
- Build chunked, parallelized NLP workflows to process large unstructured enterprise datasets efficiently.
- Support fine-tuning and evaluation of domain-specific LLMs using sanitized data, RAG, and structured prompts.
- Conduct 20+ SME and user interviews to understand GRC workflows and improve enterprise chatbot performance.

Software Engineer Intern, Bank of America - Jersey City, New Jersey

06/2025 to 08/2025

- Implemented ML-based test case prioritization, accelerating regression runs and improving resource utilization.
- Engineered Python CI/CD pipelines with Pandas to clean/transform 1M+ rows of data, reducing processing errors.
- Built a full-stack visualization tool (React.js + Flask + Plotly) to analyze 10K+ projects across 8 business lines.
- Developed a reusable Plotly charting library, standardizing visualizations and cutting dev time across teams.

Treasury Technology Intern, United Parcel Service (UPS) - Atlanta, Georgia

03/2024 to 09/2024

- Automated treasury workflows with 10+ Google Cloud Functions (Python), saving 20+ hours/week of manual effort.
- Optimized ETL pipelines with Pandas + BigQuery SQL, enabling real-time financial analytics at scale.
- Reengineered interest expense reporting using VBA + Python, cutting quarterly 10-Q filing errors and increasing efficiency.
- Created CI/CD dashboards for bank fees and commercial paper YTM, enhancing cost analysis for senior treasury managers.

LEADERSHIP

Applied Combinatorics Teaching Assistant, Georgia Institute of Technology - Atlanta, Georgia

08/2025 to Present

- Lead 2 weekly sessions for 300+ students, reinforcing core concepts such as probability, statistics, and graph theory.
- Designed supplemental materials and problem sets to simplify complex proofs and combinatorial reasoning.

Quantitative Analyst, Georgia Tech Student Foundation (GTSF) Investments Committee - Atlanta, Georgia

08/2025 to Present

- Optimize VC2 strategy by adding quality, sentiment, and momentum overlays to improve cheap stock identification.
- Implement automated workflows to enable autonomous trade execution and systematic monthly portfolio rebalancing.

PROJECTS

closet_1821

06/2025 to 08/2025

- Architected and deployed a cloud-native app on Google Cloud Run with Firestore (NoSQL) + Cloud Storage
- Built a secure RESTful Flask API with user auth, optimized queries, and automated seller notifications via Gmail API.
- Developed a TypeScript + React frontend with reusable components and Swiper.js modals for image-heavy UX.
- Integrated Google Cloud Vision API to auto-classify uploads, reducing manual categorization and improving usability.

green_thumb

02/2025

- Built an NLP-based investment platform using OpenAI + FinBERT to score financial news sentiment at scale.
- Engineered data pipelines integrating Yahoo Finance and Polygon.io APIs to normalize and aggregate market data.
- Developed a React.js frontend with Recharts to visualize stock rankings, risk factors, and performance metrics.
